

Lifebuoys Lights L170

Daniamant design and manufacture all of our products in line with the Quality Management System (ISO), relevant worldwide approvals, technical specifications, current legislation and International directives.

Our mission is to achieve World class performance through partnerships with our suppliers, customers and employees, providing products and services that enhance the safety and security of our customers.

Daniamant products cover five key areas:

- Lifejacket Lights
- Liferaft Lights
- Lifebuoys Lights
- Intrinsically Safe Lights
- Special Lights

Further Information

The Technical Data Sheet, Installation & Operating Instructions & Product Safety Data Sheet (PSDS) can all be found on our web site. This information was correct at time of going to press, please check our web site for any updates.

Daniamant operates a policy of continuous improvement and reserves the right to amend the specifications in accordance with that philosophy.

SOLAS Approved Lights

The L170 is available in two versions. We offer a commercial version and a version with a unique bracket, specially designed for mounting with leisure Lifebuoys. Both versions are fully SOLAS approved and differ only in the bracket supplied. Both brackets are designed for easy fitment.

Fit and Forget

Both Lifebuoys Lights offer a five year life. No maintenance or replacement batteries are required. This saves time and expense during inspections.

Compact size

These Lifebuoys Lights are amongst the smallest and lightest lights available on the market today.

76 Metres Drop Height

MED/SOLAS and USCG standards call for the Lifebuoys lights to be dropped from 30 metres. Both these Lifebuoys lights have passed a drop height test from 76 metres high. This makes these new lifebuoys lights suitable for use on any platform or vessel with high bridge wings.

LED Technology

Both Lifebuoys Lights are using the latest advances in LED technology. They feature very low current consumption and enhanced reliability. Both our Lifebuoys Lights feature a flashing light.

Low Cost transportation

These new lights are exempt from transport packing, marking and labelling regulations under surface ADR and IMDG Special provision 188, IATA Packing Instruction 970 Section II, making shipping easier, quicker and cheaper.
